RE: Recall Notice

This notice is to inform you that items you **may** have purchased were recalled by the manufacturer. R.J. Reynolds Vapor Company has voluntarily issued a nationwide safety recall on **VUSE VIBE products containing the VIBE Power Unit (Vibe Kits and Vibe Power Units)** after receiving consumer complaints about malfunctioning batteries causing the power unit to overheat and may create a fire risk. If you have received the product, we request that you remove the product from the shelves and segregate the product from your saleable inventory. **It is important to immediately stop selling the VUSE VIBE products listed below to consumers.**

In addition, the ***VUSE VIBE Pre-filled Tanks that are NOT affected by the voluntary recall*** must be removed from the shelves and not sold.

We will contact you with more specific procedures once we receive notification from the manufacturer. Please check the FDA website for more information about the recall.
